Feature for PizzaT-Good

- Menu
- Cart(Add item to the list cart after click “Add to Cart”
- About (Ike’s bio)
- Tab (Home, Notifications and About)

I wish I could add some features for PizzaT-Good if I have time

- Cart(Add item to the list cart after click “Add to Cart”
- Category
- Notifications
- News
- User feedback
- Database
- Setting

My self-evaluation is 73%

- I love to learn about Kotlin and Java Android. Of course, I know java but I learned new things from Kotlin as well.
- I love to research different information on the internet to help me understand better and skills to improve my project better.
- I need to learn more about how MVC can use Kotlin and Java
- I need to learn more about how the framework use connecting the function from between layout and MainActivity.
